Global Manufacturer of Digital Panel Meters & Data Loggers

A PERFECT 'ROUND'

Lascar Electronics has launched a family of round waterproof, IP67 rated voltmeters in LED and LCD formats. They have been designed primarily for panel mount instrumentation, process & control and automotive applications.

The EM32-1B (LCD) and EM32-1B-LED (LED) voltmeters have a 3½ digit display with 8mm digit height. They both feature a 200mV full scale reading, auto-polarity, auto-zero and 3 selectable decimal points. The modules have screw terminal connections for ease of use and various operating modes can be selected via jumper links - NO soldering is required.

To install one of these round meters into a panel, drill a 32.5mm diameter hole and secure using the nut and seal provided. Once mounted in this method the EM32 modules are IP67 rated.

For further information on the EM32 Series and all the digital panel meters and data loggers designed and manufactured by Lascar Electronics, please call our sales hotline on: +44 (0)1794 884567, fax us on +44 (0)1794 884616 or visit our website at: www.lascarelectronics.com
