Global Manufacturer of Digital Panel Meters & Data Loggers

Lascar Meter Combines Ultra-Miniature Design with Low Current Consumption

Lascar Electronics has extended its range of low-cost, ultra-miniature panel instruments with the introduction of the OEM 1B, a 3½ digit, LCD voltmeter combining very low current consumption with a compact body design and clear, 8mm digit height. Connected simply via two rows of pins, the OEM 1B is suited particularly to applications where space may be at a premium but, despite its size, does not compromise functionality. Features of the OEM 1B include selectable decimal points, auto-polarity, auto-zero, 200mV full scale reading and available on-board calibration. The low cost of the module make it a viable option for both high and low volume applications with prices starting at £15.50 in low quantity (£9.30 at OEM quantities of 250+). The OEM 1B is available immediately.

For further information on the OEM 1B and all of the digital panel meters and data loggers designed and manufactured by Lascar Electronics, please call our sales hotline on: +44 (0)1794 884567, fax us on +44 (0)1794 884616 or visit our website at: www.lascarelectronics.com
