

New Product Release

Global Manufacturer of Digital Panel Meters & Data Loggers

A CHIP IN THE OLD BLOCK

Now you can buy a potted LED block with all the features of a voltmeter built in.

Lascar Electronics has added to its range of low-cost, ultra-miniature panel instruments with the introduction of the OEM 1B-LED. This module is a 3½ digit, LED voltmeter with a 9mm digit height that combines low current consumption with a compact body design no bigger than a standard LED block. Supplied in an encapsulated, compact DIL package, the OEM 1B-LED can be easily integrated into applications where space constraints exist and the full functionality of a voltmeter many times its size is required.

Features of the OEM 1B-LED include selectable decimal points, auto-polarity, auto-zero and 200mV full scale reading with on board calibration. The module's low cost makes it an attractive option with prices starting at £15.50 (volume discounts available). The OEM 1B-LED is available immediately.

For further information on the OEM 1B-LED and all the digital panel meters and data loggers designed and manufactured by Lascar Electronics, please call our sales hotline on: +44 (0)1794 884567, fax us on +44 (0)1794 884616 or visit our website at: www.lascarelectronics.com
