## A GRAPHIC DISPLAY IN A WEATHERPROOF PACKAGE

The SP 5-GFX1 is a new, low cost graphics module from Lascar Electronics. The SP 5-GFX1 utilizes a high contrast, 128 x 64 pixel LCD with vivid yellow/green LED backlighting. The LCD is driven by the onboard Chip On Glass (COG) allowing the user to interface with the SP5 GFX-1 using serial communication. The connection method to the module is a simple 10-pin SIL header.

Housed in a low profile, splash-proof bezel, the SP 5-GFX1 can be fitted into any application with ease unlike many other graphic displays. Measuring only 36 x 48mm, the module provides a high-resolution display in a compact package. The SP5-GFX1 is available immediately at a cost of £21.95 (£13.17 in OEM quantities of 250+).

For further information on the SP 5-GFX1 and all of the digital panel meters, data loggers and power supplies designed and manufactured by Lascar Electronics, please call our sales hotline at +44(0)1794 884567 , fax us on +44(0)1794 884616 or visit us at [www.lascarelectronics.com](http://www.lascarelectronics.com)'
