

# Signal power to the people.

Lascar Electronics has recently launched the SP5 1200-BL. This IP67 rated, splashproof module can measure any voltage from 4 - 25V d.c. with no extra supply required. As the meter is signal powered, most applications can be measured using only two connections to the easy-to-use terminal blocks located on the rear of the module. Housed in an attractive slimline design, the SP5 1200-BL also has a vivid LED backlight that can be powered from an external 5V source. The large, easy-to-read LCD features a digit height of 18mm, making the SP5 1200-BL visible in almost any environment.

The SP5 1200-BL has been designed for ease of use in small and high volumes. Available immediately from Lascar Electronics Ltd. at a price of £24.95 +VAT. Discount is available for volume orders. To order now, call: +44 (0)1794 884567 or order online at: [www.lascarelectronics.com](http://www.lascarelectronics.com).
