

Lascar for Design and Manufacture

Lascar Electronics Ltd. now offers a custom design and manufacturing service that provides its customers with an effective route to take projects from conception to market in a timely and cost-effective manner.

Lascar's experienced engineering design and development team have expertise in many aspects of electronic, mechanical and software design - providing the flexibility to engage all elements of the design process. This includes the design and development of custom LCD and LED displays, circuit design, PCB layout, 3D modelling, and writing PIC and Windows based software.

While full control of design and manufacture is retained in the UK, Lascar's service offers a straightforward route to Far-Eastern manufacture and the cost-benefits associated therewith. Many types of manufacturing techniques are employed including COB, COG, SM, Plastic Injection Moulding, Metal Casting and Sheet Metal fabrication processes. All manufacturing processes undertaken by Lascar are carried out to BS EN ISO 9001:2000.

If you wish to discuss a new project or would like to receive a quotation for an existing BOM please contact the Lascar Sales team on +44 (0)1794 884567 or by email on ben.savage@lascar.co.uk
