Lascar launch weatherproof LED data display

Lascar Electronics has introduced the EM32-4-LED, a 4-digit LED data display well suited for use in micro-controller based applications. The display area comprises four 7-segment LED digits and three decimal places, each of which can be individually addressed using serial communication. The low-power red LEDs provide a vivid display that can be easily read in most lighting conditions whilst drawing just 20mA at 5V. Connection to the EM32-4-LED is via a 12 pin DIL connection with industry standard 2.54mm (0.1") pitch.

The EM32-4-LED is housed in an attractive round metal alloy and glass enclosure that provides environmental protection to IP-67 when correctly mounted.

The EM32-4-LED is available immediately from Lascar Electronics with prices starting at £24.95 (£14.97 at quantities of 250+ Pcs). For further information regarding this product, or to discuss a potential application please contact the Lascar sales team on +44(0)1794 884567 or by e-mail: sales@lascar.co.uk or from the Lascar website www.lascarelectronics.com
